THE Building & Industry **PRODUCT:** IOVE

**DESCRIPTION OF** THE PRODUCT:

Powered jet fans for car parks and tunnels including the removal of smoke at high temperatures, i.e. for

operation at 400 °C for a minimum of 120 minutes.

**TEST STANDARD:** EN 12101-3

**TEST** 

A jet fan with a diameter of 340 mm was tested in a horizontal position for 135 min in an oven heated up **DESCRIPTION:** to 400 °C by means of gas burners. Temperature measurements were done with thermocouples. During

the test, temperature, volume flow, pressure and electrical values (current, voltage, etc) were measured.

The test standard requires to stop the operation after 15 min for two minutes and to restart it.

**SPECIFICATION OF** 

The jet fan tested had a diameter of 340 mm with a power input of 1.3 kW. It was equipped with

**TEST SPECIMEN:** silencers.

**MAINTENANCE OF FUNCTION INTERPRETATION TEST RESULT: RESULT** 

400 °C FOR 120 MIN **SUCCESSFUL PASSED** 

NAME OF TEST

**FACILITY:** 

MPA Braunschweig

**TEST FACILITY** Beethovenstr. 52, D-38106 Braunschweig

**PRODUCT APPLICATION**  For use as a powered smoke and heat jet fans for temperatures up to 400°C and for up to 120 min in a

horizontal position inside or outside the fire zone without thermal insulation.

**GUIDELINE (END** 

SIGNED BY:

The jet fan can be used for dual operation (normal ventilation and hot smoke removal).

USE): The product must be applied in accordance with the provisions in the manufacturer's manual. Prior to

installation the personnel must be instructed.

The above certificate is valid only when installed in accordance with the 'Product Application Guideline (End Use)'. To verify the validity of the product please log into our website, click on 'certification' and then on 'list of certificates'. You will find a list of manufacturers and a certificate with the number as given above.
