		MODEL/NO:	**Type CGF Dia. 500 mm Class F300**		
FACTORY ADDRESS/REGION:	**INDUSTRIVEJ 22 DK-4700 NAESTVED Denmark Tel: +45 7077 88 99 Email: info@novenco-building.com**	**LOGO ON THE PRODUCT:**	Building & Industry NOVENCO SCHAKO Group		

DESCRIPTION OF THE PRODUCT: Powered centrifugal jet fans for car parks and tunnels including the removal of smoke at high temperatures, i.e. for operation at 300 °C for a minimum of 120 minutes.

TEST STANDARD: EN 12101-3

TEST DESCRIPTION: A centrifugal jet fan was mounted at the ceiling of the furnace. It was heated up to 300 °C by means of gas burners. Temperature measurements were done with thermocouples. During the test, temperature, volume flow, pressure and electrical values (current, voltage, etc) were measured. The test standard requires to stop the operation after 15 min for two minutes and to restart it.

SPECIFICATION OF TEST SPECIMEN: The centrifugal jet fan tested had a diameter of 500 mm. The power input was 1.2 kW.

TEST RESULT:

MAINTENANCE OF FUNCTION	INTERPRETATION	RESULT
300 °C FOR 120 MIN	**SUCCESSFUL**	**PASSED**

NAME OF TEST FACILITY: MPA Braunschweig

TEST FACILITY ADDRESS/REGION: Beethovenstr. 52, D-38106 Braunschweig

PRODUCT APPLICATION GUIDELINE (END USE): For use as a powered centrifugal jet fan for temperatures up to 300 °C and for up to 120 min in a horizontal position inside or outside the fire zone without thermal insulation.
The fan can be used for dual operation (normal ventilation and hot smoke removal).
The product must be applied in accordance with the provisions in the manufacturer's manual. Prior to installation the personnel must be instructed.

Head of certification

The above certificate is valid only when installed in accordance with the 'Product Application Guideline (End Use)'. To verify the validity of the product please log into our website, click on 'certification' and then on 'list of certificates'. You will find a list of manufacturers and a certificate with the number as given above.
